Custom Sites

Unique design & functionality to meet your needs.

Custom website design is a great way for the client to bring a *specific look or function* to their website. Each custom website is unique and can either create a signature look for the client or achieve a complex function.

Right For You?

2b design or not 2b...that is the question.

Smart practice means outsourcing work that is not a core part of your business - such as building a website. Our core business is producing websites that work.

Small Businesses

Our [readyWeb](#) solution is an inexpensive way for many **small/medium sized businesses** to have a professional web image with minimal upfront cost.

Institutional / Corporate

Our [Custom Designed](#) sites address the complex functional and specific aesthetic needs of **institutional or larger corporate** sites.

Personal

We build a relationship with you. We believe to be a success, this relationship cannot be outsourced. When you call, you talk to us.

Read this testimonial excerpt:

"...Their dedication to our projects has included a combination of enthusiasm, timeliness, artistry and professional excellence..."

A word from our clients...

"For nearly ten years, 2b design has given us exceptional design and technical services for our business and personal websites. Their dedication to our projects has included a combination of enthusiasm, timeliness, artistry and professional excellence that makes them the best at what they do."

Gregg Walborn (Essentia Publishing)
